Southern Post & Rail

Macrocarpa Post & Rail - Interlocking Fence Systems

Southern Post & Rail is a popular fencing choice that is suitable for both town and country. Southern Post & Rail fences come in a range of styles and designs.

Made from durable locally sourced and grown Macrocarpa, our post & rail fences can be stained for a range of finishes or left to silver naturally. These fences are cost efficient for larger properties. Southern Post & Rail fences are made from premium grade timber using a CNC (computer controlled) system for routing the mortises for a precision fit.

Macrocarpa post & rail are easy to install, simply set up the post and insert the rails. Southern Post & Rail interlocking fences are perfect for urban or lifestyle properties and comes in many configurations: the choice is yours.

Pankhurst Sawmilling is a family run business and have been saw milling since 1981. We supply the building, construction, landscaping and fencing industry nationwide. We can also supply Post & Rail with Treated Pine Timber.

POST & RAIL STYLES & SPECS

Posts

We can produce Line, End, Corner or T Posts. Tops are chamfered on a 45 degree angle with a depth of approx. 25mm. Mortise hole sizes are 4mm larger than the chosen rail size and 50mm deep in the post.

SIZES

- Standard sizes are 150x150mm and 200x200mm
- Other sizes 150x100mm, 200x100mm, 250x250mm, 300x300mm

Custom sizes available upon request

LENGTHS

- Standard lengths are 1500mm, 1800mm or 2100mm
- 1100mm or 900mm out of the ground

Other post lengths (in/out of ground) are available upon request.

WATERPROOFING

We use "Sika Blackseal Plus" Tar on the part of the post that goes into the ground and 50mm above the ground at ground level. Sika Blackseal is a bitumen based below ground waterproofing membrane.

Rails

- Rough sawn
- Rough sawn with arised edges
- Dressed with round edges and rougher header faces

SIZES

- Standard sizes are 150x50mm, 150x75mm, 200x50mm
- Dressed Sizes are 147x47mm, 147x70mm, 196x47mm, 196x70mm

LENGTHS

Standard lengths are 1800mm or 2100mm
Other lengths are available upon request

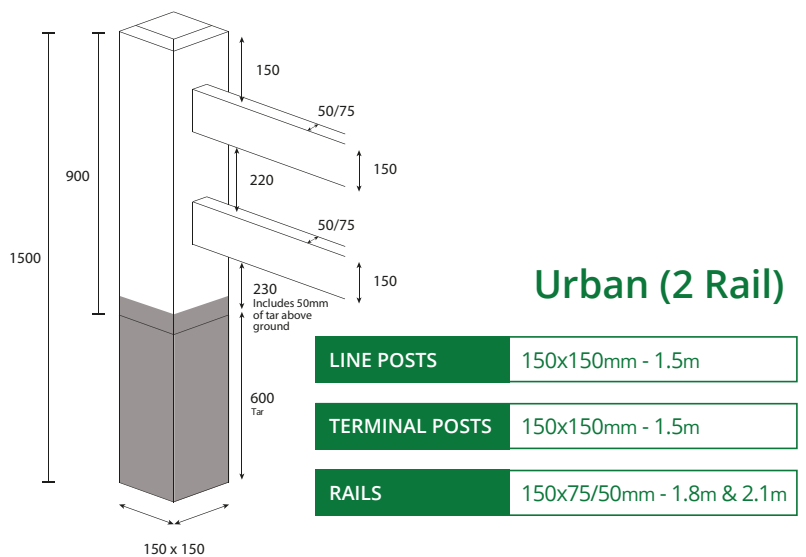

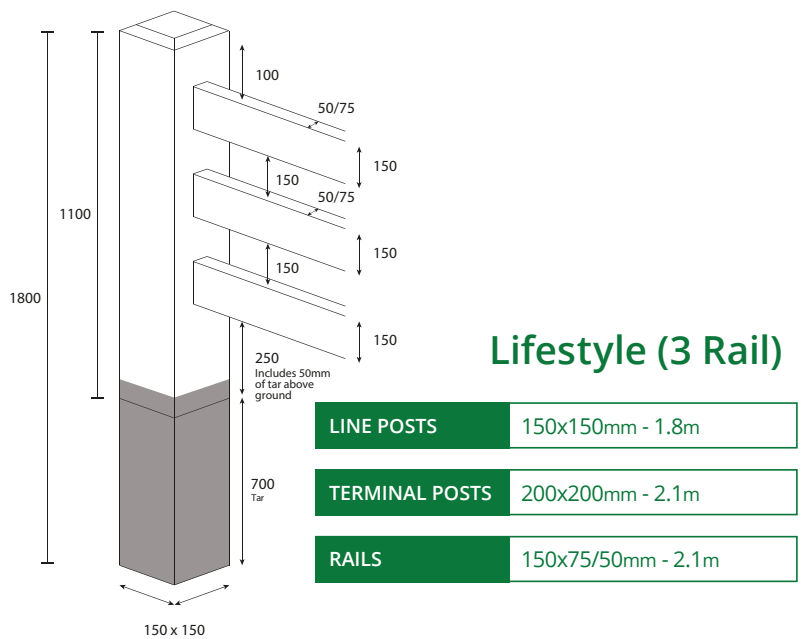

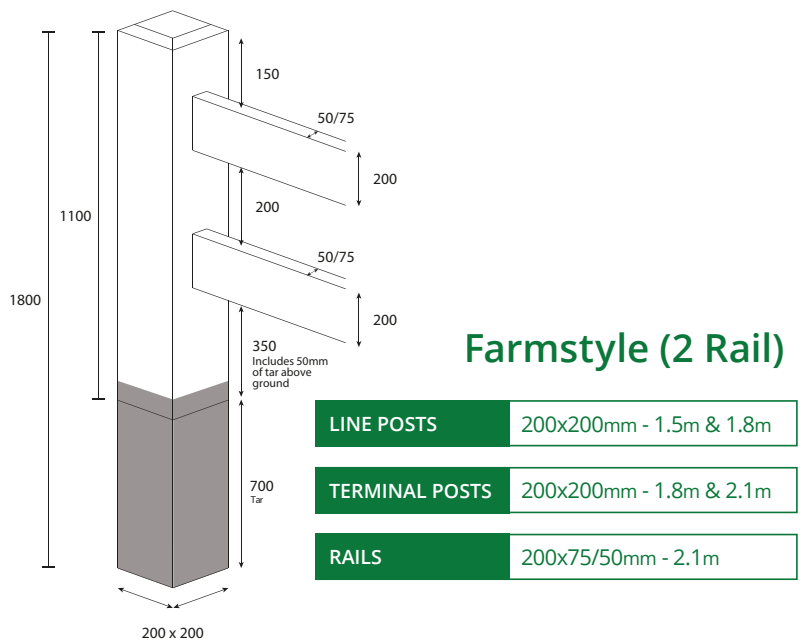

Precision cutting

Our team use a CNC cutting system to produce a precision mortise in the post. It is accurate and tidy with quality finishing. We mortise 50mm into the post.

Custom options

- Fences can be 1, 2 or 3 rail
- Wire holes can also be drilled.

We have a range of custom solutions available, including large posts, entrance ways and gates.
